

Luminoscope®

VISUAL

SLA 7

THE VISUAL HEADLAMP TESTER

The Luminoscope® VISUAL (SLA 7) is a user-friendly optical headlamp aimer for testing and aligning car headlights quickly and accurately.

Available with rubber wheels or wheels for rails

The Luminoscope® VISUAL is a versatile visual headlamp tester and does not require a power supply.

FEATURES

- | **Extra-large lens** (27.5 x 18.0 centimetres) concentrates light rays without optical distortion
- | **Viewing window** which opens onto the projection screen with **clear markings**, to make a simple **visual inspection** of the headlamps possible
- | **Rotating column** for the **perpendicular alignment** of the optical box in relation to the vehicle
- | **Standard green line laser** (110°) for alignment in reference to the vehicle
- | Compatible with **left hand and right hand drive (LHD/RHD) vehicles**
- | **No need for a power supply**
- | **Optionally fitted with a luxmeter** to measure light intensity

TECHNICAL SPECIFICATIONS

MEASURING RANGE	230 - 1310 mm
MEASURING TOLERANCE	Visual
MEASURING PRECISION	Visual
LUMINOUS INTENSITY MEASUREMENT	0 - 215 kcd (optional)
DIMENSIONS	630x570x1602 mm
WEIGHT	± 45 kg
SUPPLY VOLTAGE	N/A
CONNECTIVITY	N/A
VARIANTS	Double Rail (DR), Single Rail (SR), No Rail (NR)
OPTIONS	Luxmeter to measure light intensity, protective cover, look-in mirror, tool holder
